Opportunities with our Consulting Development Program. The high performers. The challengers. The insatiably curious risk-taking brainiacs who have compassion for the world around them. These are the people of Optum, part of the UnitedHealth Group family of companies. We're a leading health services and innovation company dedicated to helping make the health system work better for everyone. With more than 125,000 people worldwide, Optum combines technology, data and expertise to improve the delivery, quality and efficiency of health care. Beginning your career here is always rewarding and rarely easy. Take it from a few of our team members who have shared their own thoughts about the Consulting Development Program (CDP). Read on. You'll quickly discover how this can be an opportunity to do **your life's best work.SM**

Kate H. (Pasadena, CA),
Biology—Macalester College, 2013; MBA—University of
Minnesota Carlson School of Management

"I am so grateful to have found the Consulting Development Program, which recognizes the benefit of hiring, and, furthermore, celebrates associates from a diverse set of backgrounds. As a non-business undergraduate major, I found CDP has equipped

me with everything I need to become an effective consultant—from training to mentorship to coaching. I never need to look far to find the support required for my personal and professional development."

Peter K. (Mendota Heights, MN),
International Business & Chinese
University of St. Thomas, 2012

"CDP does an excellent job of creating polished consultants through a combination of trainings, various roles intended to stretch and grow the participants and by exposing us to one of the strongest networks (Optum's team of consultants). When I first started in

CDP, I had no experience in Business Analysis, Project Management or Testing. Now after four years, I feel I have a strong working knowledge of all aspects of the Software Development Life Cycle (SDLC)."

Faziah S. (Bloomfield Hills, MI),
Psychology—Dartmouth College, 2013

"Through a variety of project work, trainings, and internal projects; CDP has given me the opportunity to see health care from the perspective of its multiple actors, and understand how each is intertwined with one another—from the most minute details, to the decisions with broad impact that keep the health care

system running. In addition, I found it refreshing to work in an environment with other intelligent, like-minded individuals who genuinely care about doing their best work for the customers and Optum as a whole."

Jill R. (Wayzata, MN),
Neuroscience & Behavior—Wesleyan University, 2012;
MPH—University of Minnesota School of Public Health,
2014

"Working as a CDP consultant has helped me to further develop my leadership, communication and business skillset. As someone with a heavy science background and a desire to further develop my business acumen,

CDP has offered me a tremendous opportunity to learn from my colleagues and be engaged in a fast-paced and dynamic business environment. Each day presents a new challenge and learning opportunity that helps me to better understand consulting, the health care industry and Optum."
